Soft Skills: Dealing with challenges, Adaptability, Collaboration, Communication, Attention to Detail.

PROJECTS

Micronomy – Task Marketplace Platform Live Link | Client | Server

A modern web platform that connects clients and freelancers through microtasks, enabling clients to post short-term jobs and job seekers to earn money by completing them efficiently.

- Developed individual dashboards for clients, workers, and admins to streamline task management and monitoring.
- Implemented category-based work search for efficient task discovery and matching.
- Integrated a secure payment system ensuring transparent and reliable transactions.
- Utilized Firebase Authentication to safeguard user and client data across the platform.
  Tech Stack: HTML, CSS, JavaScript, React.js, Node.js, Express.js, Tailwind, MongoDB, Firebase

ChronoRelic – Digital Artifact Showcase Platform Live Link | GitHub

Developed a visually immersive web app that digitally preserves and showcases artifacts from ancient civilizations. Enabled users to explore curated timelines, contribute discoveries, and engage with weekly historical highlights.

- Designed an aesthetic landing page featuring highlighted artifacts, weekly picks, civilization timelines, and curator's selections.
- Built an All Artifacts explorer enabling users to discover historical items from around the world.
- Implemented user contributions for artifact uploads and interactive feedback through like/dislike functionality.
- Integrated Firebase Authentication for secure user data management and access control.
  Tools: HTML, CSS, JavaScript, React.js, TailwindCSS, Firebase, Chrome DevTools, Express.js, MongoDB
